Andrey Popov
Game Developer

Professional Summary

I am a trained Game Developer with 6 years of expertise in Unity, C#, Object Oriented Programming, Game Development and Game Design. In addition to thorough understanding of how video games are made, game engines, game development tools and software, I have a strong reputation for being tenacious, positive, articulate and autonomous.

💼 Work Experience

Game Programmer
APE-X 2023 - 2024

As a Game Programmer at APE-X, I spearheaded the rapid prototyping of hyper casual mobile games using the Unity Game Engine. I concentrated on implementing engaging gameplay features and maintaining a clean project and gameplay structure. I ensured high standards of code quality and effective version control throughout the development process. This entailed collaborating closely with teammates to troubleshoot issues and optimize performance.
